| IDEA: | **Virtual ecosystem: Refining and development** |
| TECHNOLOGY: | **Processing** |

**Project Roles:**

Elliot

**Project Outline:**

For Assignment 2, I created a framework for virtual creatures, but it did not work well, especially since I did not make many types of creature. I still think that idea has a lot of potential, and would like to keep working on it and get it to work.

**Week 1:**

| Mon | Tue | Wednesday | Thursday | Friday | Saturday | Sunday |
|---|---|---|---|---|---|---|
| | | Today. | Have working demonstration frame-work with current creature. Send in first version. | | Add a creature. Send in second version. | |

**Week 2:**

| Mon | Tue | Wed | Thursday | Friday | Saturday | Sunday |
|---|---|---|---|---|---|---|
| Add virtual pet creature. Send in third version. | Should be feature complete. Send in finished version. | Submit final version if debugging was needed. | | | | |
